OBJECTIVE

Computer Science undergraduate with a strong interest in Full Stack Development and Machine Learning, bringing hands-on experience building end-to-end applications (React/FastAPI/PostgreSQL) and ML-driven systems (NLP-based matching, anomaly detection) — looking to apply both software engineering and data science skills to solve real-world problems.

TECHNICAL SKILLS

Languages	Python, Java, C, C++, JavaScript, SQL
Frontend	React.js, HTML5, CSS3, Recharts, Responsive Design
Backend	FastAPI, REST APIs, CRUD Operations, JWT
Databases	PostgreSQL, MySQL
ML / NLP	scikit-learn, NLP (TF-IDF, Cosine Similarity), Isolation Forest (Anomaly Detection)
Tools	Git, GitHub, Docker, Mininet, BeautifulSoup, Sequelize, VS Code, Postman

INTERSHIPS

Python Backend Developer Intern — DLithe (June 2026 – Present) [Remote]

- Developing FastAPI backend services and RESTful API endpoints, structuring relational database schemas, and writing optimized queries for core business logic.
- Collaborating remotely in an agile, distributed team, applying backend best practices (validation, error handling, OpenAPI/Swagger docs) for a scalable, maintainable codebase.

PROJECTS

TalentMatch AI — FastAPI, scikit-learn, NLP, PostgreSQL, React

- Built a resume-ranking pipeline that extracts text from PDFs/DOCX, applies NLP preprocessing (tokenization, stopword removal), and computes job-resume similarity scores using TF-IDF and cosine similarity.
- Delivered via a React frontend and FastAPI REST backend with PostgreSQL storage, letting recruiters upload postings and resumes to instantly view ranked candidates.

CineTrack — React, FastAPI, PostgreSQL, TMDB API, BeautifulSoup

- Built a full-stack movie/TV watchlist app integrating the TMDB API for real-time ratings and metadata, supplemented by a Wikipedia scraper for extended synopses.
- Added a React + Recharts dashboard for genre-based analytics and watch-status tracking across a user's viewing history.

AI-Driven Self-Healing Network — Python, Mininet, Redis, scikit-learn, React (Ongoing)

- Designing a self-healing network using Mininet-simulated topologies, streaming real-time link health metrics (latency, packet loss, bandwidth) into Redis.
- Building an Isolation Forest anomaly detection model to flag abnormal behavior and trigger automated failover, visualized on a live React dashboard.

CERTIFICATIONS

TATA Forage: GenAI Powered Data Analytics Job Simulation

Coursera: Python

Udemy: Java

Udemy: Japanese (Ongoing)

EDUCATION

B.Tech – Computer Science — NMAM Institute of Technology | 2023–2027 | CGPA: 8.07

Pre-University (PUC) — Vikaas PU College | Score: 90.16%

High School (SSLC) — Sacred Hearts | Score: 93.76%

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

- Vice-Captain & Runner-up, CSE Department Football League — led the team as vice-captain, contributing to teamwork, strategy, and the squad's runner-up finish in the department tournament.
- Volunteered for multiple blood donation campaigns and cleanliness drives at local temples, contributing to community health initiatives and civic responsibility.

LANGUAGES

English (Fluent) • Hindi (Fluent) • Kannada (Fluent) • Japanese (Basic — JLPT N5 registered, July 2026)
